Amber,.

Just a follow up to your question concerning the pump times for storm events at Allen Family Foods, Harbeson facility.

The storm water pumps have been set to work on a continuous basis with a on/off float. The pumps handled a 2" rain event with no discharge.

Hope you have a good holiday!

Lou Ann

Good Morning Lou Ann:

This email shall serve to confirm the details of our conversation held Friday, December 8, 2006. An extension has been granted to allow BP Environmental sufficient time to address concerns relayed in my October 2, 2006 letter.

BMPs will be reviewed in the interim.

Can you please verify whether or not the facility has increased the pump times for all storm events?

Thank you,

Amber N. Moore

Subject: AI-130-02 - Harbeson Stormwater

Amber,

This is follow up to our conversation today concerning Allen Family Foods, Inc. (Allens) Harbeson Facility. BP Environmental, Inc. (BPE) has been asked by Allens to help with the investigation into the exceedances at this facility. As we discussed, I would like one of my associates, Dr. Ed Hipps, to have review this situation. Ed will be in the area at the end of January.

On behalf of Allens, BPE is therefore requesting an extension from your October 2, 2006 correspondence until this inspection and review is conducted.

As we discussed, in the meantime we will be reviewing the Best Management Practices. WE will keep you posted on our progress.

Please feel contact to if you have any questions or concerns (302) 629-6505.

Thank you for your cooperation with this request.

Lou Ann Parson
BP Environmental, Inc.
